

Summary of carboNZero certification

Brother International (NZ) Limited

Year 1 of 3 year certificate period

Brother International (NZ) Limited meets the requirements of carboNZero^{Cert™} certification having measured its greenhouse gas emissions in accordance with the requirements of ISO 14064-1:2006, committed to managing and reducing its emissions and neutralised its remaining unavoidable emissions through the cancellation of an appropriate number of verified carbon credits in respect of the operational activities of its organisation.

Introduction¹ – Brother has had a presence in the New Zealand market for over 50 years. In that time Brother has grown to be the leading providers of print and imaging equipment, sewing machines and labelling hardware in New Zealand. Products Brother offers include; laser printers and multi-functions, inkjet multi-function centres (MFCs), fax machines, labellers, label printers, and a wide range of home and industrial sewing machines. Brother also offer a range of cost effective lease and cost per page deals to meet the changing needs of small to medium size and corporate businesses. Brother services the retail, corporate and business to business markets.

Brother aims to fulfil its corporate social responsibilities at ever higher levels through continuous commitment to environmental challenges, to raise environmental activities to among the best in the industry, and to instil a strong sense of pride so that employees feel truly proud to be part of Brother.

Boundary – Figure 1 below shows the organisational structure used for describing the organisation's greenhouse gas (GHG) emissions inventory, and what business units were included in the inventory in the context of the entire organisational profile. The parts of the structure (business units) in blue have been identified as being within this emissions inventory.

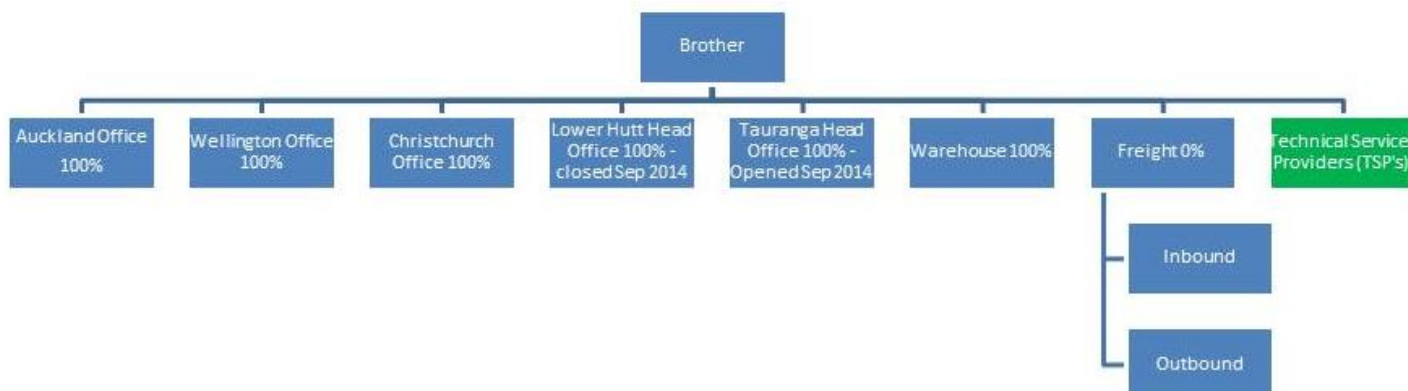

Figure 1: Organisational structure showing business units included and excluded.

Consolidation approach – The operational control consolidation approach has been used to account for operational emissions with reference to the methodology described in the GHG Protocol and ISO 14064-1:2006 standards.

Base year – 01/04/2011 to 31/03/2012

Measurement period – 01/04/2014 to 31/03/2015

¹**Disclaimer:** This Disclosure Statement is a summary of the verified information considered for certification and the certification decision. It should not be taken to represent the full submission for certification. Whilst every effort has been made to ensure that the information in this Disclosure Statement is accurate and complete, Enviro-Mark Solutions Limited does not, to the maximum extent permitted by law, give any warranty or guarantee relating to the accuracy or reliability of the information.

Summary of carboNZero certification

Brother International (NZ) Limited

Year 1 of 3 year certificate period

Emissions source inclusions – The operational GHG emissions for the organisation by emissions source are shown in Figure 2 below.

Figure 2: GHG emissions by emissions source.

Emissions as tonnes of carbon dioxide equivalents (tCO₂e) for this period were:

Emissions summary by scopes		Units
Scope 1 total	155.38	tCO ₂ e
Scope 2 total	49.17	tCO ₂ e
Scope 3 total	918.5	tCO ₂ e
Mandatory scope 3	912.11	tCO ₂ e
Additional scope 3	6.39	tCO ₂ e
One-time scope 3	0.00	tCO ₂ e
Total inventory:	1123.05	tCO₂e

Emissions source exclusions – The following emissions sources were excluded from the inventory for this measurement period:

- Technical Service Providers (TSP's) are excluded as they are contracted service providers where Brother has no control over their emission activities.
- Taxis listed on staff expense claims have been excluded from this inventory as this has been deemed *de minimis*.

Emissions reduction commitments – A GHG emissions management plan and reduction targets have been developed.

- Reduce emissions from freight air travel long haul by 66% from baseline by 2018

Emissions reduction report against last year's plan – Total GHG emissions for the organisation were 1,123.05 tCO₂e for this measurement period, compared to the base year, which was 1,633.76 tCO₂e, this is a reduction of 510.71 tCO₂e or a 31.3% reduction. The comparison to the previous measurement period found a decrease in absolute GHG emissions of 96.14 tCO₂e or a 7.9% reduction. The emissions intensity (tCO₂e/\$M) clearly shows continuous reductions since the base year. The emissions intensity achieved a 28.7% reduction since the base year (Apr 2011 - Mar 2012).

Summary of carboNZero certification

Brother International (NZ) Limited

Year 1 of 3 year certificate period

Offset – 1123 Bundled wind power project in Tamil Nadu, India credits have been cancelled on the carboNZero register and will be cancelled (or equivalent) on the relevant external registry within one month of certification. Specific details of cancellation, including serial numbers, will be available on the external registry: www.vcsregistry.com.

Note: 0.63 tCO₂e were not required to be offset as emissions were from a carboNZero certified supplier, Wellington Combined Taxis.

Verified by – Enviro-Mark Solutions Limited

Data quality score – High

Threshold of materiality – Excluded emissions do not exceed 5% of the total footprint within the organisation boundary stated.

Level of assurance – Reasonable

Certification status – carboNZero certified organisation

Certificate number – 2015061J, Year 1 of 3 year certificate period

Valid until – 26 June 2018
